Dear Moya,

We've been working on updating the navigation from the home page - hope you find it helpful!

DYED HEMP

I've been carrying the allhemp3 dyed hems for awhile, but I now have some finer weight dyed 10/2 hemp in stock. Available in 12 colors.

Since hemp "numbers" are different - this yarn would be similar to a 6/2 size in cotton. It has approximately 2500 yards per pound.

Weavers - sett at 15 - 20 epi - great weight for towels!

Knitters - this would be a fingering weight

LEASE STICK HOLDERS

This is for the weavers - another great tool which is especially useful when warping back to front. These will hold your lease sticks (or dowels) and there are holes at either end so you can tie them off.....and they are made from exotic woods and lovely to use!

As always - I do appreciate your continuing support
